

BUNGA RYLLA OCTARAMADHANY

Fresh Graduate – Informatics (Software Development & Data)

Tasikmalaya, West Java, Indonesia | 082118409315 | enrowen1@gmail.com | linkedin.com/in/bunga-rylla-octaramadhany | github.com/enrgwen

PROFILE

Informatics undergraduate student at Universitas Siliwangi with a 3.90/4.00 GPA. Experienced in building web-based projects (PHP, TypeScript, Next.js, Tailwind CSS) as well as data and machine learning projects (Python, XGBoost, Random Forest). Comfortable working across end-to-end data pipelines and user interface development, with a solid foundation in AI, Data Science, and SQL gained through certified training. Also experienced in software quality assurance, including test planning and blackbox testing. Detail-oriented, collaborative, and ready to contribute as a fresh graduate in software development or data-related roles.

EDUCATION

Universitas Siliwangi — B.S. in Informatics

Tasikmalaya, West Java

5th Semester | GPA: 3.90 / 4.00

TECHNICAL SKILLS

- Programming Languages: Python, PHP, TypeScript, SQL
- Web Development: Next.js, Tailwind CSS, HTML/CSS, REST API
- Data & Machine Learning: XGBoost, Random Forest, Logistic Regression, Scikit-learn, Streamlit, Pandas, NumPy
- Software Quality Assurance: Blackbox Testing, Test Planning, Test Case Documentation
- Data Annotation & Labeling
- Database: MySQL
- Tools: Git & GitHub, Jupyter Notebook

LANGUAGES

- Indonesian — Native
- English — Proficient
- Mandarin Chinese — HSK 2

PROJECTS

Drowsiness Detection System — Data Science Project *Python, XGBoost, Random Forest, Streamlit*

- Built a machine learning pipeline for a driver drowsiness detection system based on Sensor Fusion, combining physiological and vehicle telematics data.
- Implemented and compared XGBoost, Random Forest, and Logistic Regression models to improve detection accuracy (XGBoost achieved 88% accuracy and 0.93 ROC-AUC).
- Designed a data pipeline that prevents data leakage (GroupShuffleSplit, Winsorizing, SMOTE) and built an interactive dashboard using Streamlit.

NeuroLuka — B2B & Farmer Traceability Information System *Next.js, Tailwind CSS, TypeScript*

- Built and optimized a B2B system along with a farmer traceability feature.
- Developed the user interface and landing page using a modern tech stack including Next.js and Tailwind CSS.
- Wrote a highly type-safe codebase, with 99.8% of the project written in TypeScript.

Tata Bisnis Terintegrasi — Integrated Business Management System for MSMEs (UMKM) *Final Project — QA/QC, Blackbox Testing*

- Acted as QA/QC for a final-project web application built to help MSMEs (UMKM) manage financial record-keeping, business workflow, and inventory/stock tracking.
- Applied blackbox testing methodology to verify application functionality against business requirements.
- Authored test planning documents and test case/execution reports to support the QA process.
- Achieved an A grade for the course.

CRUD PHP & MySQL — Web Programming Coursework *PHP, MySQL*

- Built a Create, Read, Update, Delete (CRUD) application using native PHP with MySQL as the database.
- Implemented database connections and input validation for data management forms.

CERTIFICATIONS

- Introduction to AI — Dicoding Indonesia (Dec 2024)
- Introduction to Data Science — Dicoding Indonesia (Nov 2024)
- Introduction to Structured Query Language (SQL) — Dicoding Indonesia (Nov 2024)
- Getting Started with Python Programming — Dicoding Indonesia (Dec 2024)
